

Advantage Aviation Technologies

King Air Exhaust Restoration

Advantage Aviation Technologies specializes in aircraft welding repairs, aircraft overhauls, and engineering repairs for aircraft components and subcomponents.

AAT's state of the art aerospace precision restoration allows crack repair beyond the OEM specifications. We repair all flange holes and adjust the geometry of the bolt circle. Part is bead blasted and inspected using our florescent penetrant technology.

Our Geometry Adjustment is a critical function in exhaust repair. This adjustment insures that future stress cracks DO NOT occur after remounting of the exhaust. Our Florescent Penetrant system allows us to find cracks not visible to the naked eye to prevent future cracks.

Normal repairs have 5 Day turn around. AOG Service is available next day in most cases, if necessary

Save up to 75% compared to new part cost
